**MLR Reclamation Awards
Selection Criteria**

AWARD	CRITERIA
Outstanding Operator	<p>This award recognizes operations which have done an excellent job of mine development and/or operations on a daily basis. Outstanding operations can lead to outstanding reclamation.</p> <ul style="list-style-type: none"> • Attention to detail and maintenance of on-site controls to prevent or minimize degradation of water quality. • No significant enforcement actions within the last ten years. • Going beyond the requirement of rule such as wider setbacks than required, over-designed facilities to reduce potential impacts, e.g. sediment ponds, enhanced visual screens, or buffer strips to protect stream drainages or habitat. • Leading the way by using innovative techniques that improve the quality of operation and enhance environmental protection. <p>Operating in a manner that reduces reclamation liability by completing concurrent reclamation on sand and gravel or industrial mineral sites or by maintaining benching on quarry highwalls.</p>
Outstanding Reclamation	<p>This award recognizes operations which go beyond minimum requirements and/or have a creative approach to reclamation. Minimum standards for reclamation require leaving a non-eroding landform with a stable vegetative cover. To a certain degree, reclamation requirements are site specific. Outstanding reclamation sites may also go beyond requirements of the DOGAMI approved reclamation plan for that site.</p> <p>Examples of outstanding efforts which could be considered are:</p> <ul style="list-style-type: none"> • irregular shorelines and islands for wildlife habitat vs. standard slope and revegetation • enhanced habitat and/or species diversity over what existed prior to mining, e.g., creation of wetlands, fisheries enhancement, etc. • reclamation blends in with surrounding landforms, i.e., aesthetically pleasing • voluntary reclamation on exempt land • backfilling the mine area other than where it is required to protect groundwater quality • development of public access and recreation opportunities through reclamation • collection and use of native species <p>Other considerations:</p> <ul style="list-style-type: none"> • degree of difficulty and cost of the reclamation. • use of new or innovative approaches that improve quality of reclamation and/or have industry-wide applications.
Outstanding Reclamation Planning	<p>This award is for operators who, prior to receiving a permit or amendment, submit detailed innovative or creative integrated reclamation plans that are consistent with, but exceed minimum standards for reclamation habitat, i.e. construction or creation. A nominated reclamation plan must be compatible with local zoning and may also provide a greater degree of environmental protection of adjacent natural resources than what is required by statute.</p>
Outstanding Reclamationist (From Within the Industry)	<p>DOGAMI would like to recognize a “Reclamationist of the year”, an individual responsible for mine reclamation from planning to implementation to equipment operation, who provides an enthusiasm and creativity, producing superior reclamation.</p>
Oregon Plan	<p>This award recognizes an operator who voluntarily creates or enhances salmonid habitat within a permitted area, or who volunteers equipment for off site use.</p>
Small Operator	<p>Same as for large operator, just on a smaller scale. Award may either recognize outstanding reclamation or operator.</p>
Good Neighbor	<p>Unselfishly working with neighbors and the community in a spirit of cooperation to reflect a positive image of the mining industry. Development of cooperative projects which benefit the environment and the community.</p>
Exploration	<p>This award is for operators who do a commendable job of reclaiming exploration roads and drill pads to the pre-mine topography and revegetating the site to blend in with the surrounding vegetation, and following established drill hole abandonment procedures for ground water protection.</p>
Agency	<p>This award is separate because reclamation is often underwritten as part of an associated highway construction project. All government sites are exempt from bonding requirements.</p>
Voluntary Reclamation	<p>This award recognizes those operators who perform reclamation on lands that have been deemed exempt from the reclamation law.</p>
